## **DETAILED ACTION**

## Allowable Subject Matter

Claims 1-49 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious an apparatus for measuring a spectral distribution of a narrow-band laser beam including: an interferometric device tunable to any of a plurality of free spectral ranges, such that the beam traversing the interferometric device is tuned over one of the plurality of free spectral ranges, wherein spectral information is determined by using a detector to measure the intensity of the beam at each of the plurality of free spectral ranges, in combination with the rest of the limitations of claim 1.

As to claim 14, the prior art of record, taken alone or in combination, fails to disclose or render obvious an apparatus for measuring a spectral distribution of a narrow-band laser beam including: a tunable interferometric device such that the beam traverses the tunable device on a first and retroreflected for a second pass and is tuned over one of a plurality of free spectral ranges, wherein spectral information is determined by measuring the intensity of the beam at each of the plurality of free spectral ranges, in combination with the rest of the limitations of claim 14.

As to claim 28, the prior art of record, taken alone or in combination, fails to disclose or render obvious an apparatus for measuring a spectral distribution of a narrow-band laser beam including: an interferometric device disposed for two passes by the beam, wherein the interferometric device is tunable such that beam traversing the interferometric device is tuned

Art Unit: 2877

over one of a plurality of free spectral ranges, and the spectral distribution is determined by examining each of the plurality of free spectral ranges, in combination with the rest of the limitations of claim 28.

As to claim 32, the prior art of record, taken alone or in combination, fails to disclose or render obvious an apparatus for measuring a spectral distribution of a narrow-band laser beam including: a pressure-tunable interferometric device being tunable to any of a plurality of free spectral ranges, in combination with the rest of the limitations of claim 32.

As to claim 41, the prior art of record, taken alone or in combination, fails to disclose or render obvious an apparatus for measuring a spectral distribution of a narrow-band laser beam including: a tunable interferometric device such that the beam traverses the tunable device on a first and retroreflected for a second pass and is tuned over one a free spectral range, wherein spectral information is determined by measuring the intensity of the beam at the plurality of free spectral range, in combination with the rest of the limitations of claim 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick J Connolly whose telephone number is 703.305.4397. The examiner can normally be reached on 9 am-5.30 pm ... Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank G. Font can be reached on 703.308.4881. The fax phone number for the organization where this application or proceeding is assigned is 703.872.9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703.308.0956.
